- Experience developing construction project schedules for projects over \$100M
- Experience with transportation and facility construction projects is a plus
- Construction management experience is a plus
- Bachelor's Degree in Architecture, Construction Management, Engineering or related field. This requirement may be waived with 5+ years of direct, vertical construction industry experience
- PSP certification preferred (AACEI)
- PMI-SP certification preferred (PMI)
- Cost estimating skills are a plus
- Must have experience with MS Office
- Strong written and verbal communication skills
- Excellent planning and organizational skills
- Functional use of Microsoft Word, Excel, Outlook

**Responsibilities:**

- Create WBS
- Create Activity IDs
- Prepare summary and detail level schedules
- Perform Digger baseline and update analysis
- Develop full CPM logic generated baseline schedules for projects
- Resource and cost load baseline schedule
- Perform regular progress updates and create target comparison and periodic look-ahead schedules
- Monitor and track progress at detailed and summary level
- Perform schedule analysis
- Prepare Time Impact Analysis and or recovery schedule
- Provide support and training in the use of project and scheduling software to office and job site staff when necessary
- Participate in meetings with project teams, clients, owners and various stakeholders related to the project controls and schedule of a particular project.
- Review construction documents, design and specifications to accurately develop baseline schedules which include all required activities, dates, and milestones.

**Other Requirements:**

- Must be a United States Citizen or authorized to work in the US (no exceptions)
- Background check and drug screen panel are required for this position
- Equal opportunity employer
- Must possess a valid US State Driver's License and reliable transportation
